A kind of novel uniform monodispersed three-dimensional dendritic mesoporous silica nanospheres (3D-dendritic MSNSs) has been successfully synthesized for the first time. The 3D-dendritic MSNSs can have hierarchical mesostructure with multigenerational, tunable center-radial, and dendritic mesopore channels.

### Biphase Stratification Approach to Three-Dimensional ...

The Dimensional approach is the approach to classifying mental disorders that quantifies a person's symptoms or other characteristics of interest and represents them with numerical values on one or more scales or continuums, rather than assigning them to a mental disorder category. Diagnosis then becomes not a process of deciding the presence of a symptom or disorder but rather the degree to which a particular characteristic is present.
