to understand the requirements and meet Division 2 of the Food and Drug Regulations. This draft guide was available for public consultation in the fall of 2012.

### **Active Pharmaceutical Ingredients - Good Manufacturing ...**

The Active Pharmaceutical Ingredient (API) is the part of any drug that produces the intended effects. Some drugs, such as combination therapies, have multiple active ingredients to treat different symptoms or act in different ways. Production of APIs has traditionally been done by the pharmaceutical companies themselves in their home countries.

### **What's an Active Pharmaceutical Ingredient (API)?**

The Active Pharmaceutical Ingredient Industry is the organ by which active pharmaceutical ingredients are manufactured from raw materials through both chemical and physical

Your Molecule. Our Motivation. Alcami's advanced capabilities and services include reliable cGMP based manufacturing of advanced chemical intermediates and active pharmaceutical ingredients (APIs) for preclinical, clinical, and commercial supply.

## **API - Alcami Corporation**

Abstract: Active Pharmaceutical Ingredients (API) of good quality are core to the manufacturing of effective and safe essential drugs. The price of APIs is the main cost driver for manufacturing. Only a limited number of large manufacturers of finished pharmaceutical products have their own API manufacturing capabilities, and none of them can make all required APIs in-house.
