Most people, myself included, use transient-mark-mode (or just tmm), a great piece of kit that makes Emacs behave sanely by using visible regions like other editors. But tmm can get in the way of Emacs's point and mark system, as the mark also serves as a handy beacon that you can set with C-SPC and jump to with C-u C-SPC.. Sadly, most of the point and mark commands generally go unnoticed by ...
