Hello, I have a Mazak VTC 20B that has a clicking noise going on when I rapid or Home the Y-Axis. Has anyone experienced this before? It click going in both directions I haven't had a chance to diagnose further as I am the only one in the shop at the moment and I'm not going to crawl into the back of the machine with out another person being with me at the E-Stop button.

Mazak VTC 20B Y-Axis clicking noise - Practical Machinist

The Mazak VTC-20B is a CNC vertical machining center. It comes equipped with a grease lubricated and coupling driven spindle capable of running up to 8,000 rpm. CHALLENGE

Mazak VTC-20B Spindle Repair | Case Study | Northland Tool

That's represented by the slanted lines, show on the Mazak drawings you posted first. It's a really common design on most Japanese spindles. Because it doesn't have a thread on the spindle for a normal hug nut, speith nut etc. Thread drunkenness isn't a problem.
